# Mined Minds

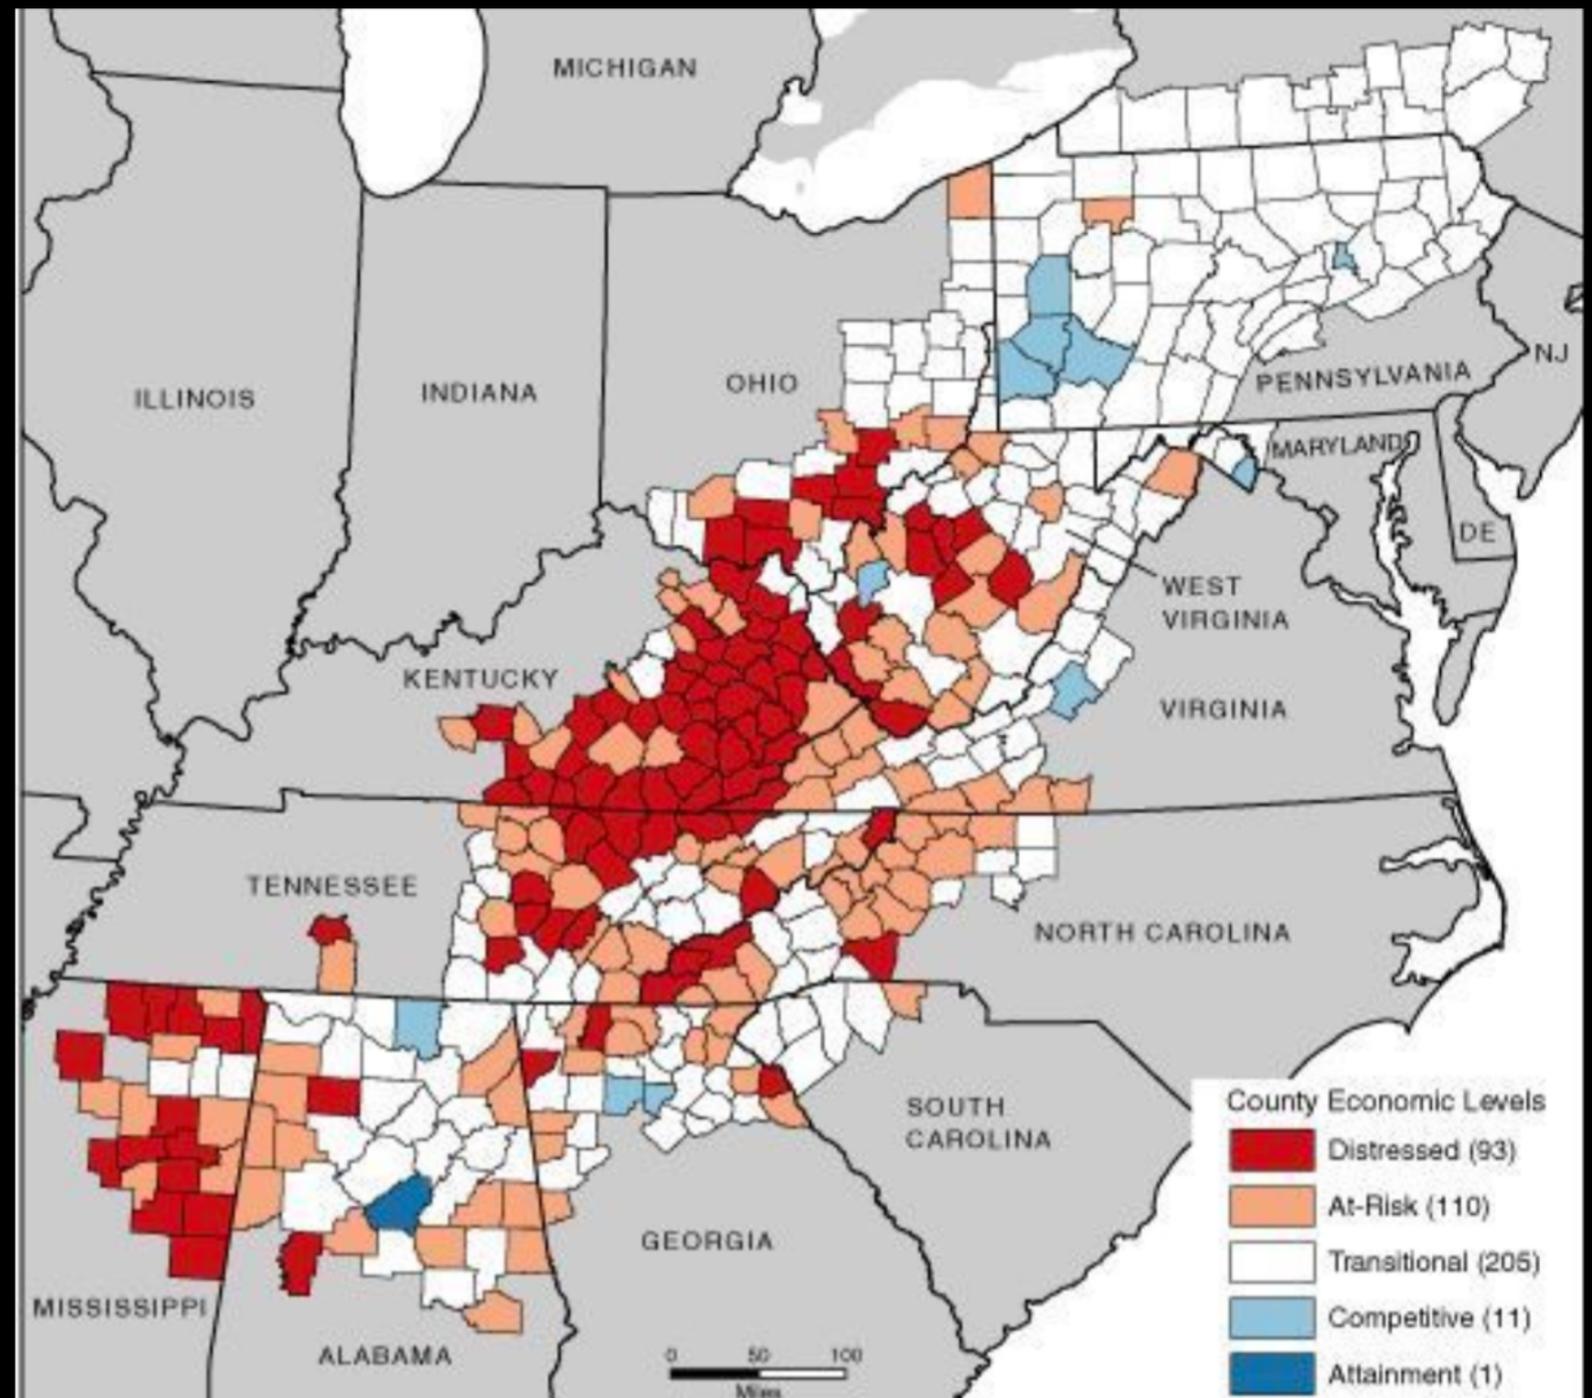

Non-profit bringing  
programming  
opportunities to rural  
communities in  
Appalachia

Consultancy employing  
Appalachian software  
developers

Up to 94% of coal jobs have been lost between 2011 & 2016

For every coal mining job lost 5 other jobs are affected

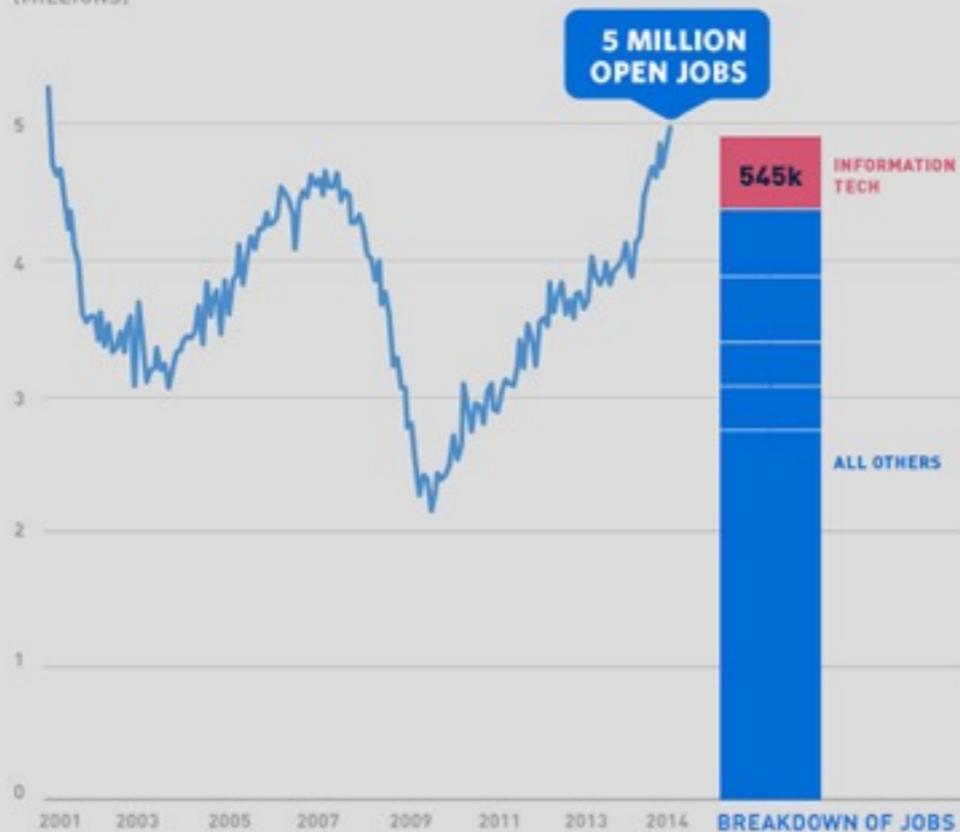

Meanwhile in tech...

## AMERICA HAS MORE OPEN JOBS TODAY THAN AT ANY POINT SINCE 2001

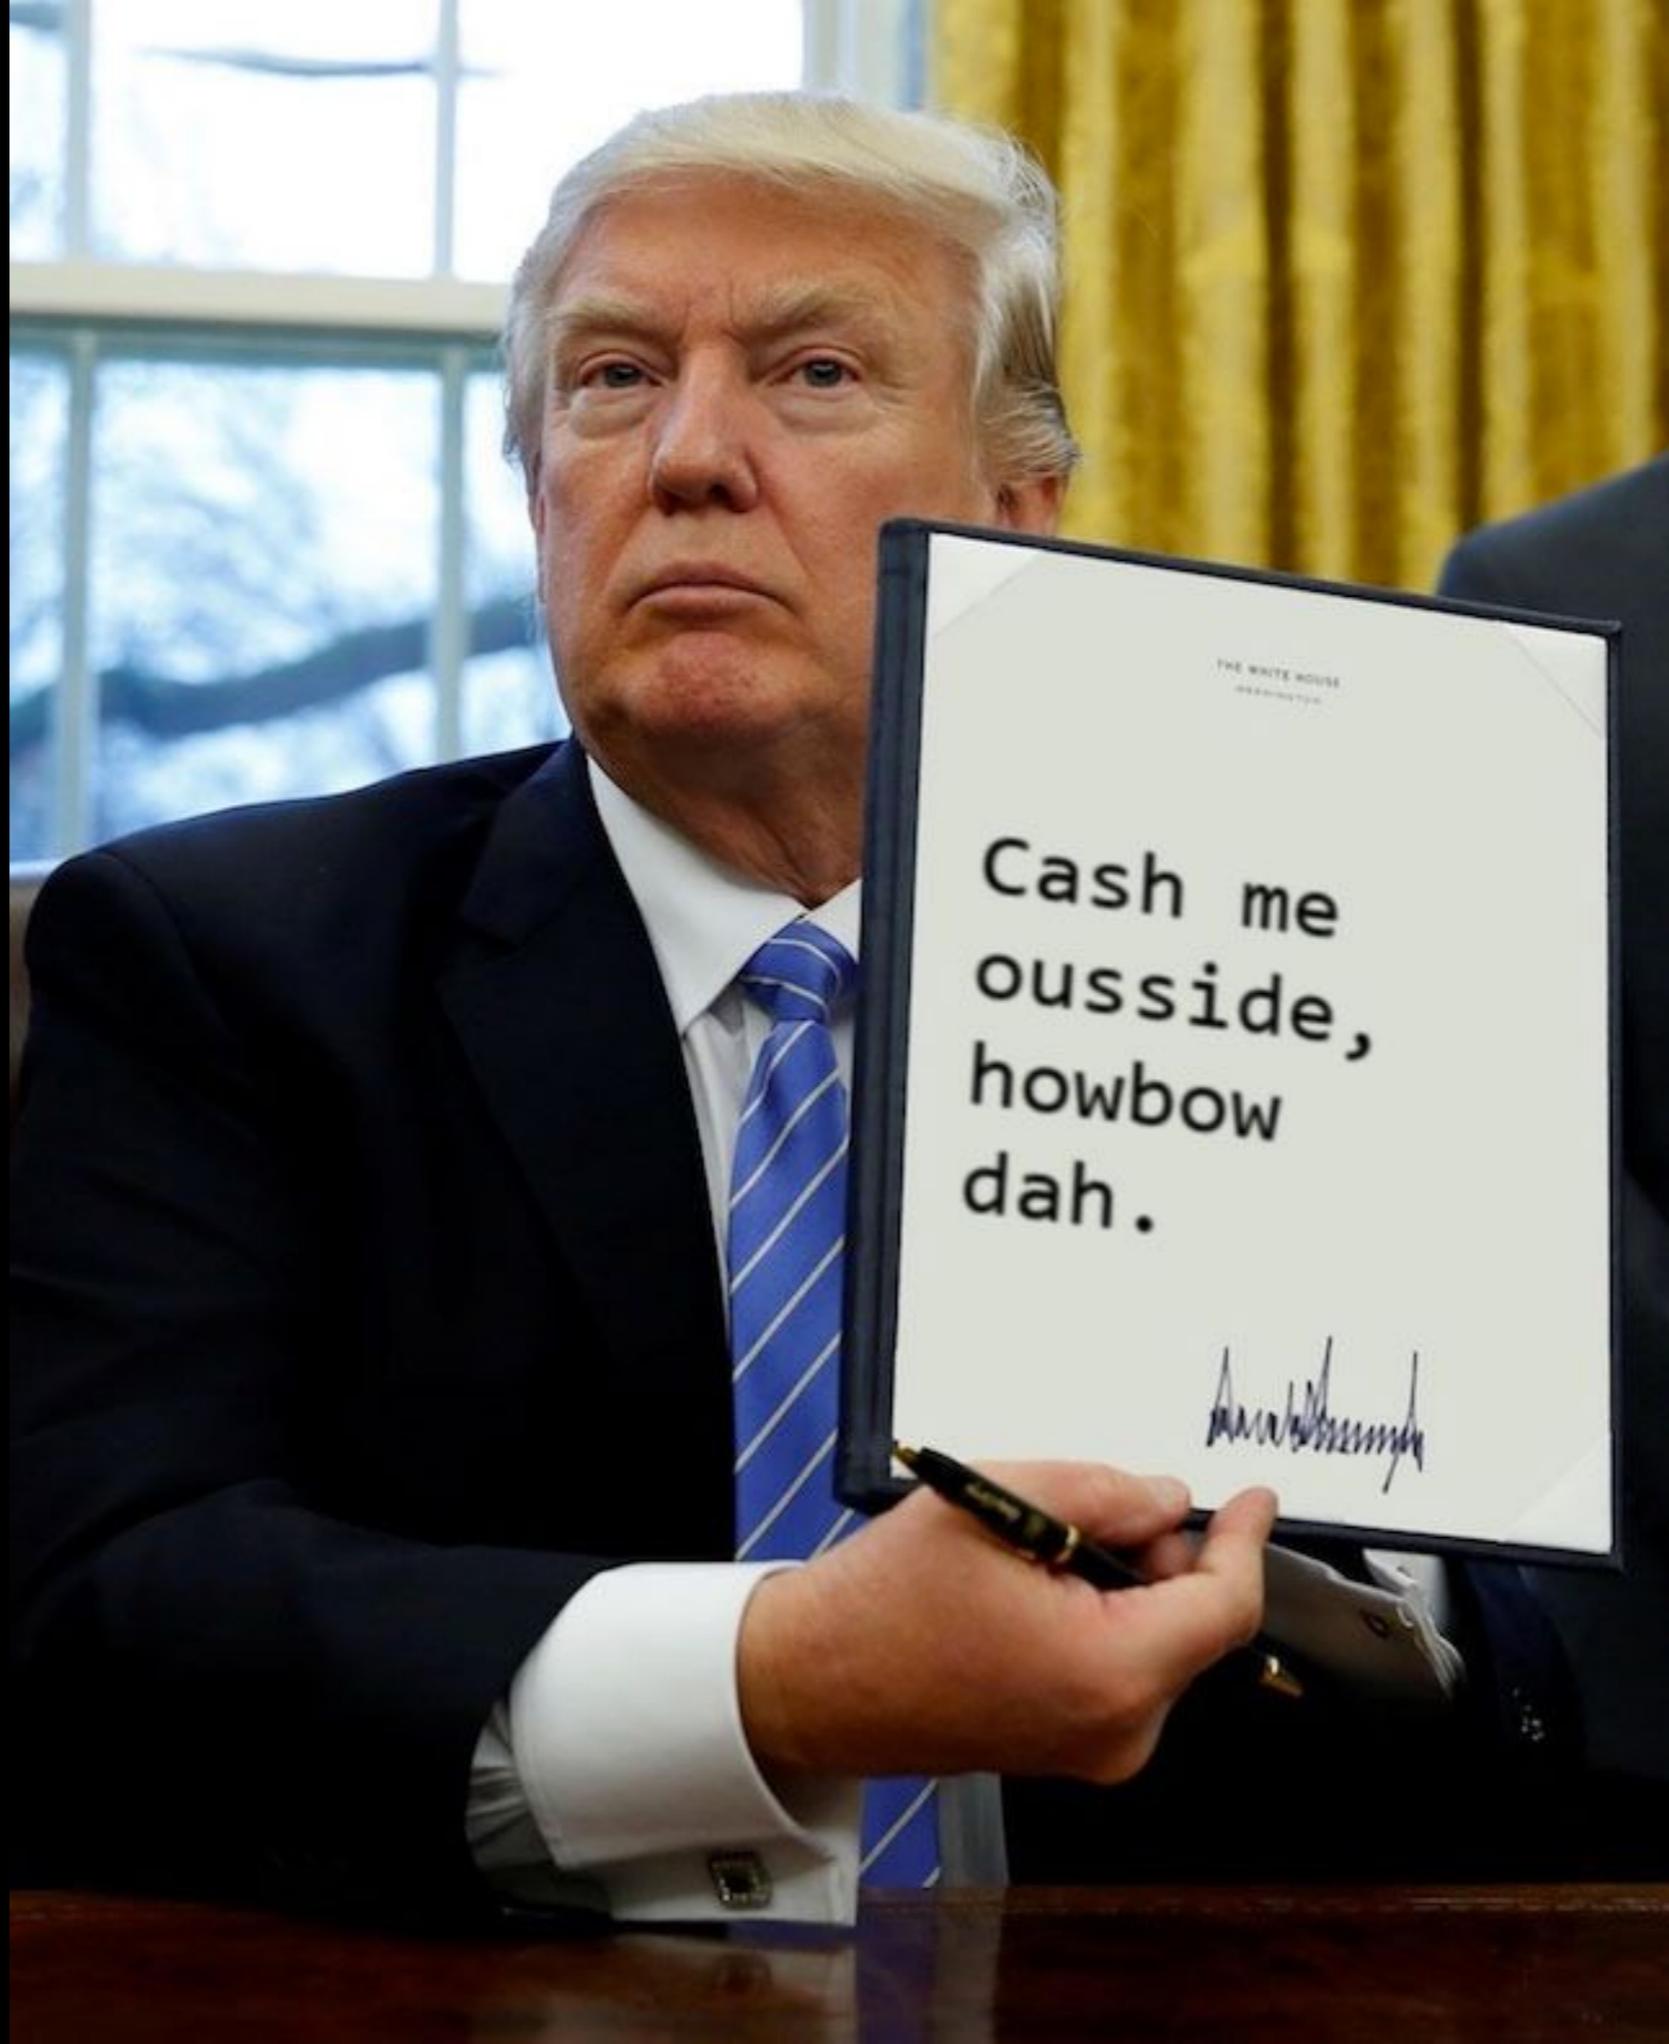

Over half a million are well-paying jobs in information technology, more than any other major occupation.

OPEN JOBS (MILLIONS)

SOURCE: BLS FOR TOTAL OPENINGS; BURNING GLASS FOR OCCUPATIONS

“The U.S. Department of Labor has said 1.4 million unfilled software development — software development alone — 1.4 million unfilled jobs by 2020. So the skills gap is real,” Richard Burke, CEO of Chicago-based Envoy Global

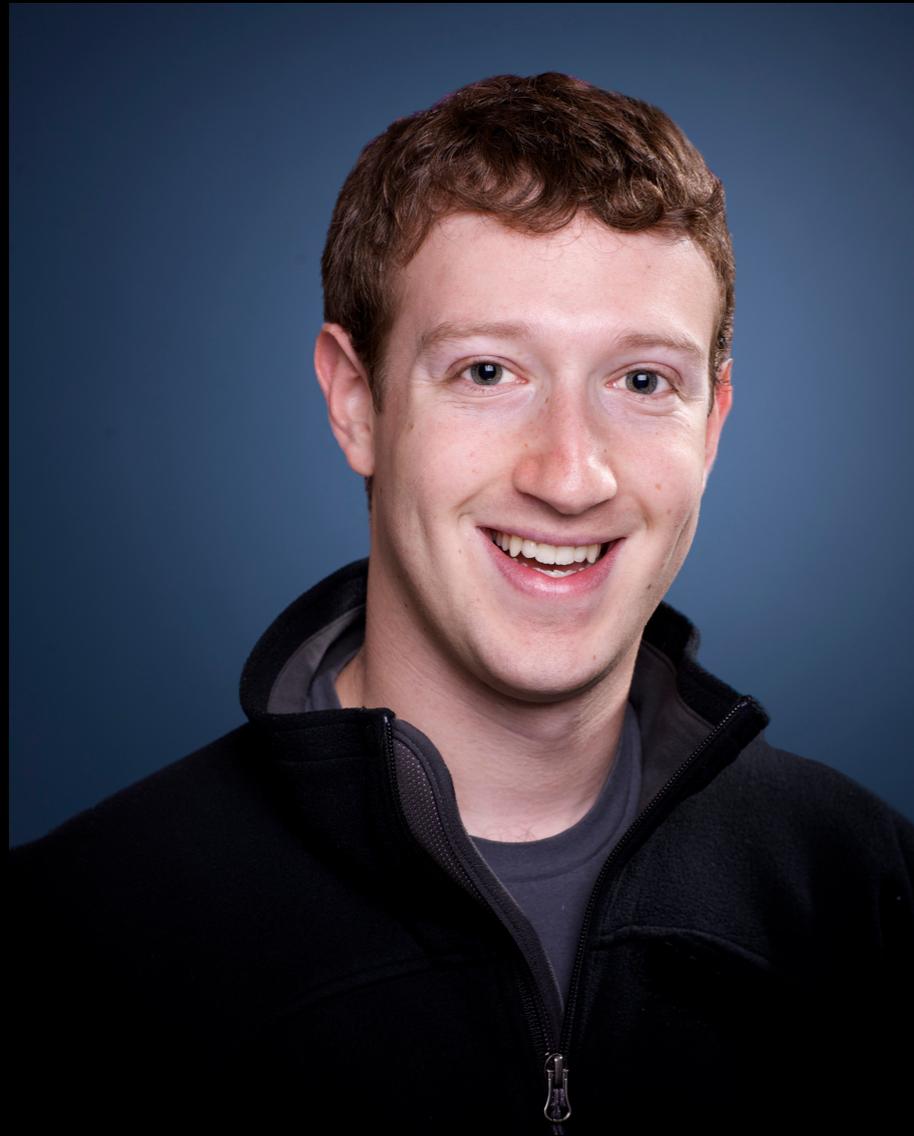

THE WHITE HOUSE  
WASHINGTON

PERSONALITIES

# Compete with offshore

*"the quality of the output is higher than I've ever been able to get from offshore resources."*

- James Rooney, President of Waylon Industries

*"...companies thinking of outsourcing work to India or Ukraine will see the benefit of using [Mined Minds] coders in Pennsylvania and West Virginia"*

- Ed Crooks, Financial Times

*"It's important to support companies that do great things, and the work meets the quality we expect from our own developers"*

- David Pollak, VP Engineering at Kiva.org

In order for all of this work to be sustainable, we need an entire ecosystem to support a tech hub

So what have we  
learned?

# Staged pathway into tech is possible

If we don't know, we  
don't say no, and  
anything is possible!

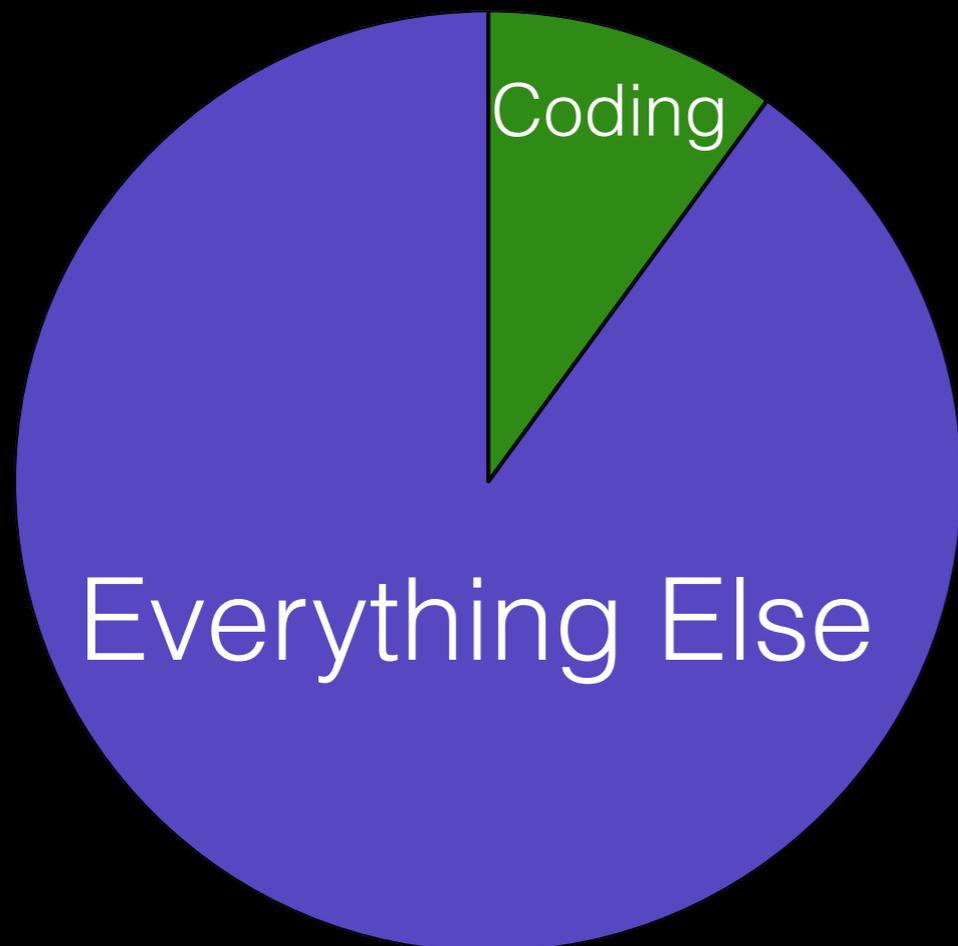

People learn at different paces:  
does not correlate with  
intelligence

# Multiplier effect

Coding ability is only a  
small indicator of  
success in coding career

We aren't currently  
raising lifelong  
collaborative learners

What can you do to help  
create a society of life  
long learners?
