

The Power and Performance of Phoenix LiveView

Performant server-rendered HTML that actually works

Phoenix LiveView

Today's *extensive* plan

Briefly discuss Phoenix LiveView's benefits

Change a traditional web application into a real-time one... LIVE!

**Push HTML from the server over
WebSockets**

**Send only what changed to the
client (no markup!)**

Javascript and form hooks for real-time user feedback

**Reusable HTML components,
each with their own managed state**

Live navigation

Distributed and real-time

elixir

Phoenix Framework

Enough talk
