
Using JavaScript to Find Your Dog

— Developer Advocate @DVCorg —
Milecia McGregor @FlippedCoding

Overview

- The project
- The hardware
- Node server
- The front-end
- Key takeaways

The Project

The project

- Dog disappears
- You know they are around
- They won't respond to you
- You have no clue where to look

The hardware

Node Server

Node server

- concurrently
- cors
- express
- **johnny-five**
- path

The Front-End

Key Takeaways

Key takeaways

- Do fun stuff
- You can do everything with JavaScript
- Working with hardware is a different challenge
- Explore new areas of tech
